

# DXC Vendor Portal using SAP Build Work Zone Advanced Edition

Vendor Collaboration and Empowerment

## Solution Overview

•The Vendor Portal is a comprehensive digital workplace solution designed to boost Vendor engagement and productivity. It provides a unified entry point to business applications, processes, and communication, supporting a wide range of devices and delivering a consistent user experience. It's part of SAP's integrated low-code offering on the SAP Business Technology Platform, which consolidates various SAP solutions into a cohesive development environment. The portal is designed to streamline the procurement-to-pay process, enhance communication, and improve the overall efficiency of vendor management.

## Features

- **Vendor Profile Management:** Vendors manage their company profiles, update contact details
- **Order Management:** Viewing and managing purchase orders, including order confirmations and shipment notifications
- **Invoice Processing:** Submission of invoices and tracking of payment status
- **Catalogue Management:** Updating product catalogs, pricing, and availability.
- **Performance Management:** Access to reports and dashboards for monitoring performance metrics and compliance.
- **Notifications and Alerts:** Customizable alerts for new orders, payments, and other important events.
- **Integration Capabilities:** Ability to integrate with other systems for data exchange and process automation.

## Solution components

- SAP Build Work zone Advanced Edition
- SAP Build Process Automation
- SAP Business Application Studio

## Customer Benefits Realized

### User Empowerment

Facilitates decentralized content creation and page building for business users

### Content Integration
