# DXC AI Augmented Environmental Health and Safety (EHS) Analytics for SAP BTP

Safeguarding Tomorrow, Securing Today:
Your Partner in Occupational Health and Safety Excellence

SAP Certified Operations

DXC is SAP Global Strategic Services Provider (GSSP) and SAP certified BTP SaaS Solution in SAP Store

Proven Track Record

DXC has a proven track record in complex solution implementations & systems integration

Proprietary Methods, Tools & IP

DXC developed optimization and transformation methods and tools, content extensions and accelerators

Solution components

- SAP Analytics Cloud
- SAP S/4HANA
- SAP BW BW/4HANA
- SAP Datasphere

Customer Benefits Realized

Reduced Costs

Occupational health and safety reporting can lead to cost savings by identifying areas for improvement, reducing workplace incidents, and minimizing expenses related to worker compensation, medical treatment, and legal fees associated with accidents.

Enhanced Productivity

By ensuring a safer work environment, occupational health and safety reporting can contribute to increased productivity as employees are less likely to experience work-related injuries or illnesses, resulting in fewer disruptions to workflow and reduced absenteeism.

Improved Employee Morale and Retention

Demonstrating a commitment to employee health and safety through reporting initiatives fosters a positive work culture, leading to higher employee morale, satisfaction, and retention. Employees are more likely to feel valued and motivated when their well-being is prioritized.

Enhanced Reputation and Brand Image

Effective occupational health and safety reporting reflects positively on the organization's reputation and brand image. Stakeholders, including customers, investors, and partners, view companies with strong safety records more favorably, which can lead to increased trust and loyalty.

Legal Compliance and Risk Mitigation

By adhering to occupational health and safety reporting requirements, organizations ensure legal compliance and reduce the risk of facing penalties, fines, or litigation. Proactive reporting also helps identify and address potential risks before they escalate into legal or regulatory issues, safeguarding the organization's long-term viability.

Features

- Workplace Safety Assessment:
- Lost Time Injury Tracking
- Site and Business Line Incident Analytics
- Temporal Analysis of Injuries
- Priority Safety Rule Recommendation
- Common Injuries by Site and Business Line
- Just Ask

Solution Overview

DXC's Augmented Analytics solution offers businesses a powerful tool to enhance their Environmental, Health, and Safety (EHS) performance. By leveraging this solution, organizations can gain data-driven insights and real-time information on their EHS performance, enabling informed decision-making, risk reduction, and improved compliance. This not only leads to a safer and more sustainable workplace but also enhances brand reputation and positively impacts the bottom line. Furthermore, the solution's emphasis on EHS fosters improved employee morale and engagement, demonstrating a commitment to both environmental sustainability and employee well-being, which are crucial aspects of corporate responsibility and long-term success.
