

# SAP Signavio Process Intelligence

Accelerate your journey to operational and experiential excellence by unlocking the full potential of your process data, driving transformative outcomes for your business.

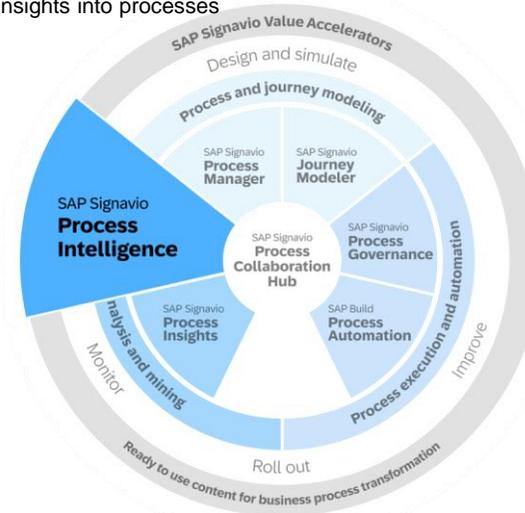

## Solution Overview

DXC Technology accelerates your journey to process optimization by quickly identifying improvement areas and streamlining the time to value from process mining initiatives.

As your trusted partner, we leverage SAP Signavio Process Intelligence to deliver end-to-end process analysis solutions, enabling you to act decisively on recommendations and adapt to process changes with ease. With a data-driven approach, we prioritize process improvements, offering seamless connectivity and reporting integration through the Plug and Gain method, ensuring rapid deployment and operational excellence.

## Customer Goals

- Analyze both SAP and non-SAP data to obtain full visibility of process performance
- Reduce time to insights and enable faster process transformation
- Uncover process inefficiencies and find areas for improvement
- Easily analyze and mine processes
- Live insights into processes

## Features:

- Process Investigations
- Process Discovery and Process Variants
- Conformance Checks (Compare As-Is vs To-Be)
- Visualization widgets and metrics to monitor performance
- Process Intelligence Dashboards
- Ability to connect to both SAP and Non-SAP systems for continuous insights and monitoring

SAP Certified Professionals Worldwide

SAP Signavio Alliance Team

DXC is continuing to develop SAP Signavio capability across all regions, with over two years of hands-on experience delivery SAP Signavio to clients

To ensure we are up to date on all the SAP Signavio capabilities and client offerings, DXC maintains a close, direct working relationship with the SAP Signavio Alliance Team

## Customer Benefits

### Discover your process reality

Get full visibility into your current processes and easily identify process inefficiencies and bottlenecks, through in-depth process mining investigations. Discover process variants or compliance violations (where your processes differ from best practices) and leverage the data to enable faster process transformation.

### Jump-start your investigations

Start your process investigation with ready-to-use accelerators, that significantly reduce the time and effort required to prepare and integrate your data. Start analyzing your data with available metrics and dashboards for faster time to insights.

### Drive process change

Visualize potential compliance violations and compare process variants against your designed process models by running conformance checks, then implement changes fast within the SAP Signavio Process Transformation Suite.
